# HarmonyPSA

## AUTOMATE SIMPLICITY.

Gain visibility across your entire business and intelligent automation designed for modern MSPs.

**See HarmonyPSA in action →**

While professional services automation (PSA) solutions for legacy break/fix approaches fall short in project management, billing reconciliation and multi-currency capabilities, HarmonyPSA is purpose-built for project profitability tracking and provides a comprehensive set of automated features.

**HarmonyPSA** is an all-in-one PSA software solution that provides full visibility of your entire business from quote to cash in a single-pane-of-glass view. The solution integrates sales, finance and operational systems into one source for enhanced efficiency and communication across departments.

- Gain visibility across your entire business by combining sales, provisioning, projects, billing and support in a single system for better decision-making.

- Automate your manual processes such as billing reconciliation, and never worry about a product or service going unbilled again.

- Add value to your business with every keystroke with no extra administration needed, saving time and avoiding complexity.

- Seamlessly transact with all of Ingram Micro, other third-party marketplaces and directly with vendors to expand your offerings and increase revenue.

### Streamline your business operations with intelligent automation

- Manage everything in one system from quote to cash for maximum efficiency with a range of automated features.
- Quickly set budgets and margins and let the solution automatically track project profitability to save time and ensure accuracy.
- Access a world-class service desk with advanced, automated ticketing and routing to improve workflows and save time.

### Simplify complex billing and financial processes with one system

- Let the system analyze procurement and invoicing to verify everything gets paid using complex billing models, including in-advance recurring billing or in-arrears PAYG metered billing.
- Replace manual and inefficient invoicing tasks with automated processes to increase accuracy and save days of time spent on billing reconciliation.
- Use multiple languages, multiple currencies, VAT/tax regimes and local dates/decimal formats to serve customers across the globe.

### Manage your sales cycle and integrate multiple purchasing sources

- Access a full CRM system for complete visibility of your customers, and easily track your sales pipeline and activities, including leads, opportunities and campaigns.
- Integrate with any marketplace or vendor to quickly buy and sell hardware, software and cloud solutions all in one place and gain additional revenue.
- Automate quotes, sales orders and purchase orders to save time, and create complex, full solution bundles in minutes to meet customer needs and increase profit.
